FURNITURE

PERFORMANCE
OUTDOOR

The Steve Silver Outdoor Difference

- Product is available as container direct or for purchase from our Forney, TX warehouse
- First shipments expected as early as March in time for the Spring/Summer selling season
- Multiple styles and multiple configurations available to choose from
- Indoor looks that dress up outdoor settings
- All products are built with features designed to resist the outdoor elements for a higher quality, more durable product

HDPE All-Weather Resin Wicker

Highest quality wicker looks like natural wicker but is made from polyethylene for more UV, rain and cold resistance and won't flake like cheaper PVC wickers

360° Welds

Stronger and Safer for a more durable frame

Powder-Coated Aluminum Frames

Rust resistant and designed to withstand harsh outdoor weather

The Steve Silver Outdoor Difference

Quicker Drying Foam Cushions

Open Cell cushion technology allows better ventilation and mold resistance

100% Solution-Dyed Fabrics

Fibers are dyed throughout (think carrot) unlike Vat-Dyed Yarns that are dyed on outside of the yarn (think radish) for a fade resistant, UV resistant and stain resistant cover.

Nylon Glides

Allows you to adjust for uneven surfaces

Steve Silver Outdoor – Many Styles to Choose From

FRAME

Why is Aluminum the #1 Choice?

- Almost all products have a base of Powder Coated Aluminum
- Aluminum is Lightweight and High Strength, Durable, Rust-Resistant and Easy to Care for
- Aluminum can withstand the elements of rain, sleet, and snow without forming Rust.
- Basket Chairs use rust-resistant Powder-Coated Steel for for the Weight and Structural Integrity necessary for the design

RESIN WICKER

All-Weather Resin looks like natural wicker but is made from a more durable synthetic material that can withstand the harsh elements of outdoors

Resin wicker works well in outdoor elements. Rain does not damage the wicker, it handles humidity well, it withstands hail storms, intense cold and intense heat – making it the perfect material for outdoor furniture.

HDPE WICKER

Why Choose HDPE Wicker?

- Steve Silver Outdoor is constructed with **High Density Polyethylene (HDPE) wicker, the best quality material** for synthetic wicker. It's made from material that is **highly durable; will not easily crack, brake or chip**. Unlike cheaper PVC wickers, HDPE wicker has the color distributed throughout the material so it is fade resistant and waterproof **and will not flake or peel** off like cheaper PVC wickers
- Our HDPE Wicker is **infused with UV inhibitors** to make it resistant to the damaging effects of the sun's rays
- **Stain Resistant** and able to withstand the harsh effects of chemical solvents
- **Waterproof** and able to withstand the harsh effects of all climates
- Eco-friendly and is 100% recyclable!

KEY POINTS

HDPE Wicker

- Stronger and More Durable
- Weather Resistant
- Stain Resistant
- Eco-friendly
- Does not peel or flake like competitor's lower quality PVC wickers

FABRICS

Solution Dyed Acrylics/Polys

- **Solution-dyed acrylic and polyester fibers are the ideal fabrics for UV resistance to sunlight.** In solution dyeing, color dye is added during the liquid stage of the fiber manufacturing prior to being cooled and then spun into yarn. Essentially, the color is actually part of the actual fibers produced. **This process makes it color-fast and water-resistant.** With competitors' vat-dyeing process, color is added only to the outside fabric layer while in a vat, resulting in less color fastness.
- The key benefits of Solution-Dyed fabric is **excellent UV resistance to color fade, superior color consistency and easy cleanability.** Because color is part of the fiber, the fabric has **excellent color fastness, fade resistance and durability.**
- Steve Silver Outdoor is **rated at the highest standard against UV rays with 2000 hours UV-treated Solution-Dyeing.** The same as many **well known and well established fabric suppliers in the Outdoor business** with one difference:
 - **Our product is available starting in Spring 2022.**

Solution-Dyed Yarns Carrot vs. Radish

YARN CROSS-SECTION

LIKE

CARROTS VS. RADISHES

Color dyed through yarn before weaving so color does not fade as readily when in use

KEY POINTS

Solution-Dyed Yarns

- Fade resistant
- Stain resistant
- UV resistant
- Saves both water and energy since it requires no liquid dyeing, rinsing and machine drying, avoiding wastewater and a drain on electricity

CUSHIONS

Open Cell Foam Cushions

Open Cell Foam Technology adds air to the foam cushions during the manufacturing process, resulting in a **more comfortable and faster-drying cushion**. The Open Cell structure of the foam allows water to pass through the cushion more easily, making the foam naturally **mold and mildew resistant**.

Closed Cell Foam

Open Cell Foam

STEVE SILVER OUTDOOR COLLECTIONS

Adeline

A cozy setting for two, the Adeline 3-Pack Outdoor set ships complete with two swivel woven chairs and a Side Table. The egg-shaped chairs swivel 360° for a relaxing casual setting on a warm Summer night. There's no need to worry about the weather with construction that features all-weather resin wicker, powder-coated aluminum frame and Solution-Dyed Acrylic covers. Built to resist the elements and provide the comfort and style you want, all in a fully assembled set. Just unbox and enjoy!

- Constructed of an aluminum frame with half round wicker
- The Swivel Accent Chairs feature a hand-brushed aluminum base and half-round wicker sides and back
- Side Table is made of powder-coated aluminum with faux plank top, brushed finish and a 55mm umbrella hole with eyelet cover
- Ships fully assembled, just unbox and enjoy
- Designed to stand alone or match fully upholstered group
- Open Cell Foam dries faster and is mold and mildew resistant
- Solution Dyed Acrylic Fabric is rated for 2000 hours of UV treatment and is fade resistant, water repellent and easy care
- Two-tone Driftwood wicker finish
- Pack includes 2 Swivel Accent Chairs & Table. Umbrella not included.

Marina

Gather, eat or even work in the great outdoors with the Marina outdoor dining set. Styled like a regular dining set but built for the elements, Marina features All Weather Resin, Powder-Coated Aluminum table frames and quick-drying cushions with weather resistant Solution-Dyed acrylic covers. This 6-piece set features transitional styling with farmhouse flair in a configuration that seats up to six comfortably. Foam baffling underneath the bench and table muffle sound and add to the weighty feel of the collection.

- Constructed of an aluminum frame with half round wicker
- Table has a 2.5 mm hand-brushed aluminum top with a faux-plank treatment and sound-proof foam underneath
- Side Chair has a hand brushed aluminum base. Seat width 19 inches. The Arm Chair has a hand-brushed aluminum base with weaved arms.
- The 2.5 mm aluminum Backless Bench features a faux-plank top with a canted faux timber-beam base and sound-proof foam underneath. The Bench ships KD.
- Two-tone Driftwood finish

Cleaning Tips For Patio Furniture

Outdoor Furniture Maintenance

- For all outdoor products, remove and store cushions when not in use or keep covered
- Store cushions in a dry & cool area (like a garage) instead of a crawl space or attic – which often are humid
- Clean using a simple solution of warm water and mild dish detergent
- Dry cushions by standing them on end (zipper end, down).

Upholstery Maintenance

- Only wash the covers when necessary. Frequent washing will affect the texture of the fabric and lead to fading over time.
- If washing is required, take covers to a professional cleaner or wash with a detergent without bleach. If steam or spot cleaning methods are not performed properly, watermarks can be left that will cause cellulosic browning.
- Do not use alcohol, chemicals or bleach as they may discolor the fabric.
- Clean up spills and marks quickly to avoid permanent staining.

- Fabrics fade over time. To maximize longevity, position fabrics away from direct and indirect sunlight. Direct sunlight can cause fading and can weaken fibers over time.

Cleaning Wicker

- Clean resin wicker weekly by using a soft brush and non-detergent soapy water to loosen any dirt and then wipe clean with a soft cloth
- Use a vacuum to clean up any extra loose debris

FURNITURE

PERFORMANCE OUTDOOR

WEATHER RESISTANT FEATURES

All-Weather HDPE Resin Wicker

Highest quality HDPE wicker looks like natural wicker, but is made of a synthetic material that is UV, rain and cold resistant and won't peel like cheaper PVC wickers with color applied throughout the wicker.

Antimicrobial Fast-Drying Open Cell Foam Cushions

Open Cell structure in the foam permits moisture and air to pass more freely than other types of foam allowing for quicker drying. In addition, its antimicrobial properties prevent mold, mildew and bacteria growth.

Fade, Stain & UV Resistant Solution-Dyed Fabrics

100% Solution-Dyed fabrics are dyed before they are spun into yarn distributing color throughout (like a carrot) making the fabric color-fast and fade, stain & UV resistant unlike outer stained vat-dyed fabric (like a radish).

Rust-Resistant Powder-Coated Aluminum Frames

Our powder-coated aluminum frames can withstand the elements of rain, sleet, and snow WITHOUT forming Rust; a claim not applicable to Steel or Cast Iron.
